

**Project Design Phase-I**  
**Proposed Solution Template**

Date	19 October 2022
Team ID	PNT2022TMID12879
Project Name	Project – Visualizing And Predicting Heart Disease With An Interactive Dashboard

**Proposed Solution Template:**

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Predicting the occurrence of heart diseases before the patient gets affected entirely can be highly beneficial as it can even save lives.
2.	Idea / Solution description	Planning to predict the Heart Disease at the stage of beginning and to Denote the Level of Disease
3.	Novelty / Uniqueness	Comparing other models the prediction will vary, considering any two or more parameters that contribute to Prediction.
4.	Social Impact / Customer Satisfaction	Project people are able to find heart disease at the initial stage by Dashboard with Regular Check-up
5.	Business Model (Revenue Model)	Model is sold to customers (Hospitals and individuals) and adding subscription for extra features
6.	Scalability of the Solution	system could predict and visualize for a large dataset to observe general trends as well as for individuals.
